

## **HeadLok Guarantee**

The coating on the FastenMaster® HeadLok Fastener has been designed to protect against corrosion in all applications, including the newer pressure treated chemicals – ACQ and Copper Azole.

FastenMaster provides a guarantee on this fastener. Under the terms of this guarantee, FastenMaster will replace any rusted fasteners and provide a fair means of remedy for the re-installation of effected fasteners for the life of the project.

This guarantee, however, does not cover the following “incorrect use” conditions:

- coating removed by means of improper installation
- salt water contact, defined as within 1/4 mile of salt water (use of stainless steel fasteners recommended in this case)
- failure due to improper application

For questions regarding the use of the HeadLok screws, please contact the FastenMaster team at 1-800-518-3569 or email us at [info@olyfast.com](mailto:info@olyfast.com).

Note: This warranty pertains to pressure treating chemicals and treatment procedures that are currently on the market as of February 20, 2004. If the chemicals and/or the pressure treatment procedures change, then this warranty may be subject to revision without notice.

**This dated warranty supersedes all written statements prior to January 1, 2006**
