

# EPDM Bubble Gasket

## **Product Description**

Premier Bubble Seal is an extruded, self-adhesive EPDM cellular rubber sealing strip.

## **Typical Application**

- Air & water seal in cladding systems.

## **Technical Information**

Base material	EPDM rubber
Colour	Black
Density	0.3 – 0.4 g/cm <sup>3</sup>
Force to compress	25% - 2.5 – 3.5N/cm <sup>2</sup> 40% - min. 3.5N/cm <sup>2</sup>
Hardness	40 50 Shore 00
Service temperature	-50° - +90°C
Water absorption	Negligible
Ozone resistance	Excellent.
Application temperature	Above 0°C
Shelf life	1 Year

Surface preparation:          Must be clean, dry & grease free

*Please note : The above technical information is given as a guide and is based on recent test data obtained under laboratory conditions. Materials should be fully tested by the end user to establish suitability of the product for the intended application. February 1997.*
