

EJOT Self Drilling Screws

The **EJOT SAPHIR** self drilling carbon steel screw JT2, case hardened, for fixing profiled metal roofing or cladding sheets to steel sections.

Quality features:

- It drills, taps and fastens in one operation.
The drill points and thread forms are designed to provide maximum mechanical performance with ample safety margins for use on building sites.
- All fasteners have a zinc or organic finish for maximum corrosion resistance in their given application.
- Available without washer or assembled with a metal backed EPDM high quality Vulcanized sealing washer.

Product advantages:

- Available in various lengths up to 192mm
- Saves one working process and costs for drilling tools.
- Precision, that works.

The **EJOT** Super-SAPHIR austenitic stainless steel JT3 with hardened carbon steel drill point means secure fastening without compromise.

Quality features:

- **EJOT** Super-SAPHIR fasteners are manufactured from 304 (A2) grade austenitic stainless steel with hardened carbon steel drill point welded to the stainless steel shank
- Corrosion resistant
- Drills fast and break-proof
- Reliable drilling and tapping at high speed drilling
- Available without washer or assembled with a metal backed EPDM high quality Vulcanized sealing washer.
-

Product advantages:

- Unique fastening system
- Available in various lengths up to 245mm
- Saves one working process and costs for drilling tools
- Precision, that works

The **EJOT** FR Low Profile Head self drilling fasteners offer an exceptionally good finish when aesthetics are an issue.

Quality features:

- Stainless steel
- Corrosion resistant
- Reliable drilling and tapping
- Torx drive on a low profile head
- Available assembled with a metal backed EPDM high quality Vulcanized sealing washer

Product advantages:

- Reduces installation time
 - Saves one working process and costs for drilling tools
- When applied using the **EJOT** FR Drive tool is the easiest low profile cladding fastener to apply on the market

The **EJOT** aluminium self drilling **SAPHIRE JT8** connects aluminium profile sheet components in one working process.

Quality features:

- It drills, taps and fastens in one operation
- Available assembled with a metal backed EPDM high quality Vulcanized sealing washer

Product advantages:

- Reduces installation time
- Saves one working process and costs for drilling tools
